

AI Engineer - Gen AI

Location: 1154 Duong Lang, Dong Da, HN

JOB DESCRIPTION

1/ Responsibilities

- Design and implement AI application solutions within information security systems
- Build software and systems utilizing AI to automate processes for monitoring, surveillance, intrusion detection, and incident response
- Research and select technologies for internal AI products dedicated to security monitoring and incident response
- Develop and integrate AI technologies into the current SOC operation process, working closely with the analysis, operations, and product development teams to enhance the performance and scaling capability of information security monitoring services

2/ Educational Background:

- Bachelor's degree or higher in **Computer Science, Information Technology, Mathematics-Informatics**, or related fields.
- English proficiency equivalent to TOEIC 650 or higher

3/ Requirements/Competencies:

Technical Skills:

- Minimum of **3 years of work or research experience** in the field of **AI/ML**; experience working on large projects related to **NLP (Natural Language Processing)** or **LLM (Large Language Models)** is highly preferred.
- Proficient in the **Python** programming language; proficient with AI programming libraries.
- Possess deep and solid knowledge of **data structures and algorithms**.
- Proficient with common **machine learning and deep learning models**.
- Knowledge of **Design Patterns for Agentic AI** and experience deploying at least one real-world project using it.
- Ability to use and **optimize prompts** and experience developing applications integrated with **Large Language Model APIs** (including function calling).

- Experience working with **time series, tabular, and text data**.
- Experience working with **LLM, GenAI, Agentic AI models**, and techniques such as **RAG (Retrieval-Augmented Generation), CoT (Chain-of-Thought)**, etc., is an advantage.
- Deep and broad knowledge of **IT system architecture** (SQL, NoSQL, Services,
- Microservices, Tensor, Container, Message Queue, etc.) is an advantage.
- Experience using big data processing platforms such as **Hadoop, Spark, Notebook** is an advantage

Soft Skills:

- Strong **system-thinking mindset**, with the ability to solve complex product-oriented problems
- Effective communicator capable of clearly explaining technical solutions to both technical and non-technical audiences
- Demonstrated ability to **lead and mentor teams**

4/ Benefits:

- Competitive Salary range + performance bonus
- Bao Viet health and personal accident insurance
- Annual healthcare check-up
- Salary review yearly on March
- 15 annual leaves (12 days of annual leave according to Labor Law and 3 days of company vacation)
- Flexible and freestyle clothes working.
- Open and grow space for any talents with global working environment
- Sports activities: Swimming, Pickleball, Billiards, Poker, PES, etc.
